10				

Information for teachers about use of Artificial intelligence (AI):
Please complete, before submitting entry.

Students were made aware that AI should only be used to help learn about the topic but not to produce the content of the entry. ☐

I believe, that to the best of my knowledge, all entries submitted have adhered to the rules for AI that apply to the MiSAC competition. ☐

Your poster should demonstrate **your own understanding, creativity and communication skills.**

AI tools (such as ChatGPT, Copilot, Gemini or image-generation software) may be used **only to support your research or help you understand scientific concepts.** They must **not** be used to write the text of your poster, generate the final design, or create the images that form the main content of your entry.

Any use of AI must be clearly acknowledged, including the name of the tool(s) used and a brief description of how they were used. Entries that appear to rely substantially on AI-generated text, images or design, or where AI use has not been declared, may be investigated and risk disqualification.

AI may be used to help you learn about a topic, but it must not provide the content of your entry.

Check list for teachers:
Please complete, before submitting entry.
